1) Nested If-Else

Q1) Check if a number is positive, and if yes, check if it is even or odd.

```
let num = 46

if(num>0){

   if(num%2==0){

      console.log(`${num} Number is Positive and Even`)

   }

   else{

       console.log(`${num} Number is Positive and Odd`)

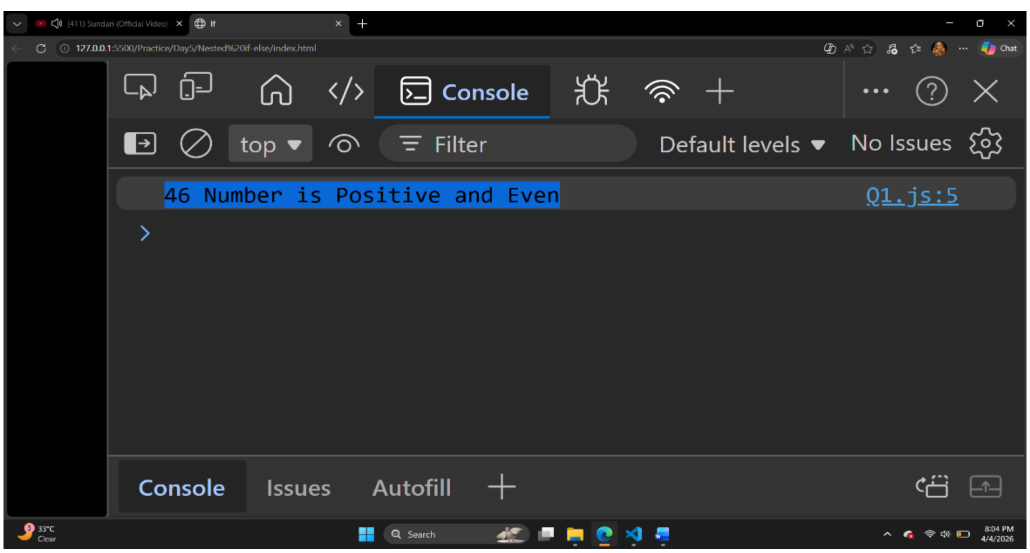
   }

}

else{

    console.log(`${num} Number is Negative`)

}
```

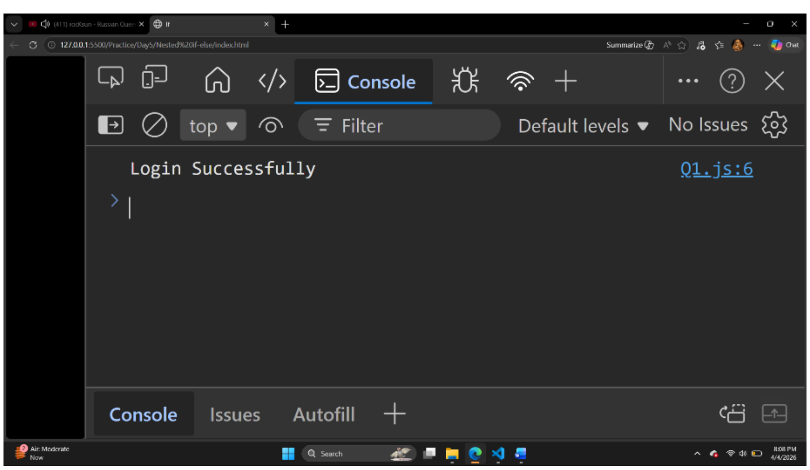


Q2) Check login system (username correct → then check password).

```
let username="Omkar"

let password="Omkar@9090"

if(username==='Omkar'){
   if(password==='Omkar@9090'){
      console.log(`Login Successfully`)
   }
   else{
      console.log(`Wrong Password`)
   }
}
else{
   console.log(`Wrong Username`)
}
```



Q3) Check if age ≥ 18, then check if person has ID.

```
let age=43

let id="Aadhar"

if(age>=18){

    if(id==='Aadhar'){

        console.log(`Person Has Id`)

    }

    else{

        console.log(`No Id`)

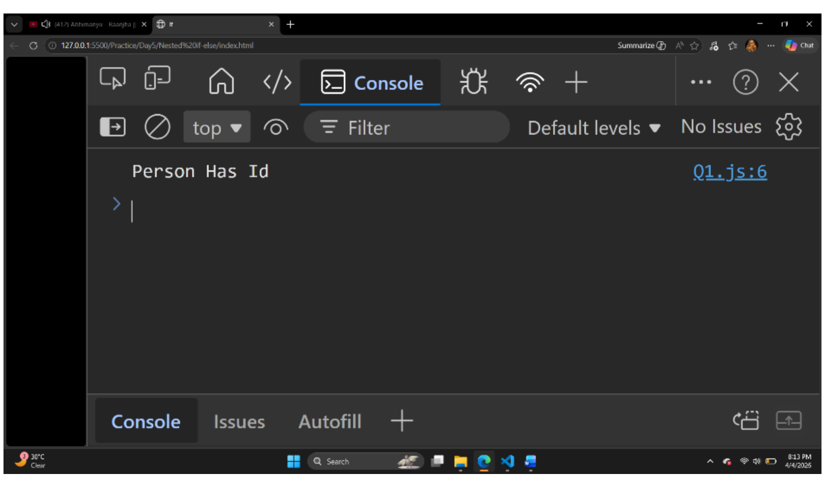
    }

}

else{

    console.log(`Person is not age>=18`)

}
```



Q4) Find the largest of two numbers, then check if it is even or odd.

```
let num1=43

let num2=41

if(num1>=num2){

   if(num1%2==0){

      console.log(`${num1} Bigger and Even`)

   }

   else{

      console.log(`${num1} Bigger But Odd`)

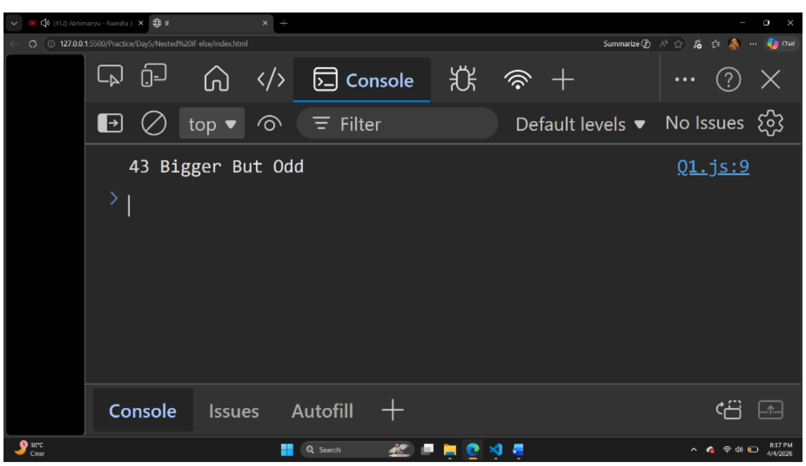
   }

}

else{

   console.log(`Smallest than ${num2}`)

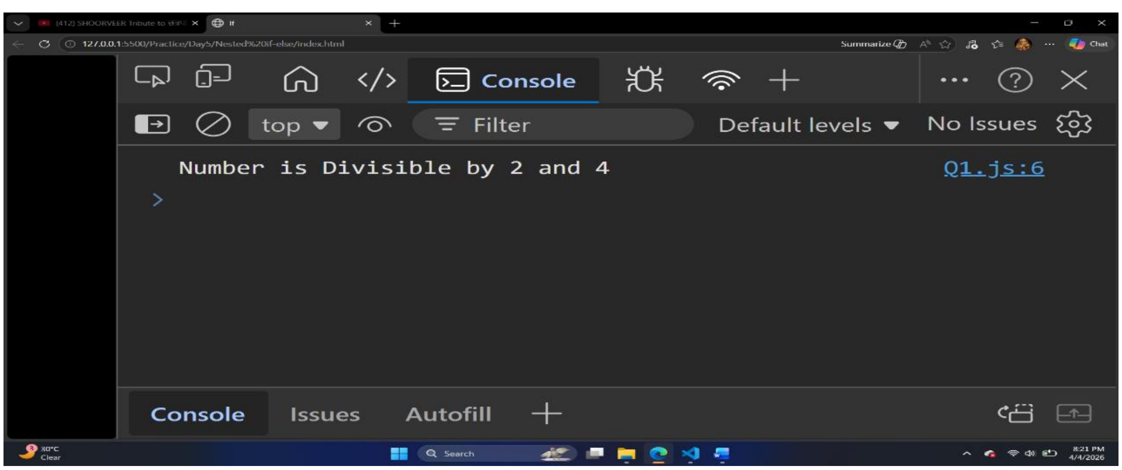
}
```



Q5) Check if a number is divisible by 2, then check if divisible by 4.

```
let num=44

if(num%2==0){
   if(num%4==0){
      console.log(`Number is Divisible by 2 and 4`)
   }
   else{
      console.log(`Number is Divisible by 2`)
   }
}
else{
   console.log(`Number is Not Divisible by 2`)
}
```



Q6) Check student eligibility: marks ≥ 50, then check distinction ≥ 75.

```
let marks=44

if(marks>=50){

   if(marks>=75){

      console.log(`distinction`)

   }

   else{

      console.log(`pass`)

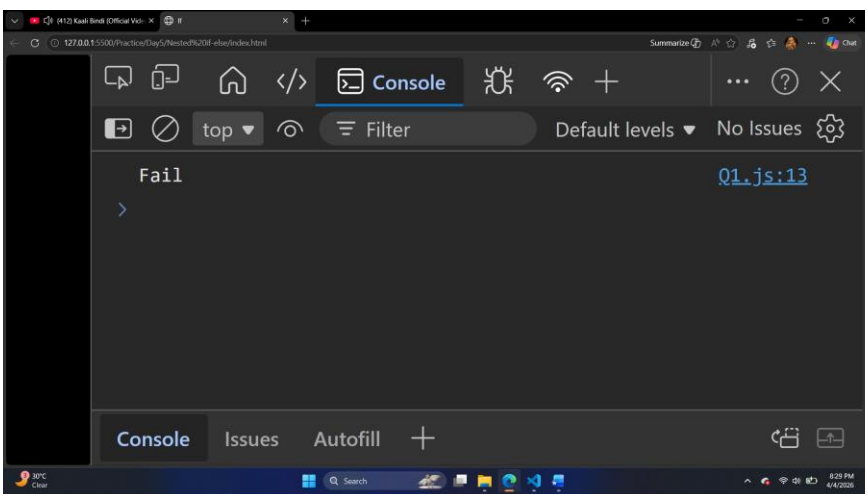
   }

}

else{

   console.log(`Fail`)

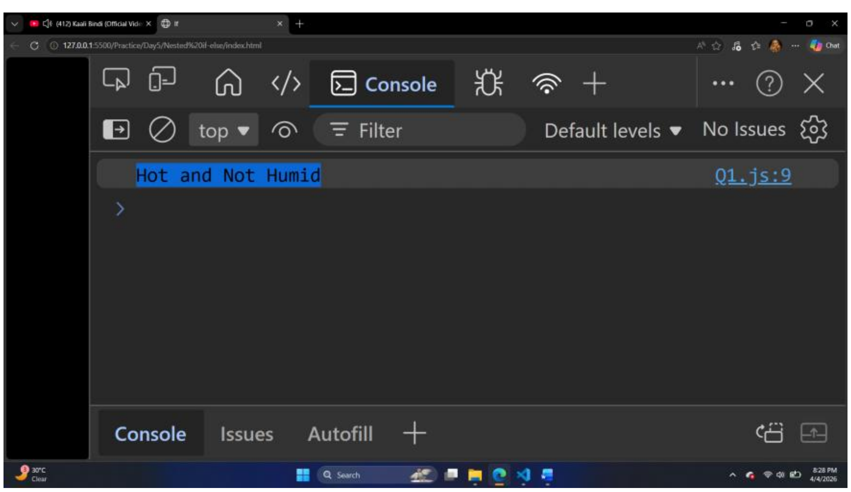
}
```



Q7) Check if temperature > 30, then check if humidity > 70.

```
let temp=45

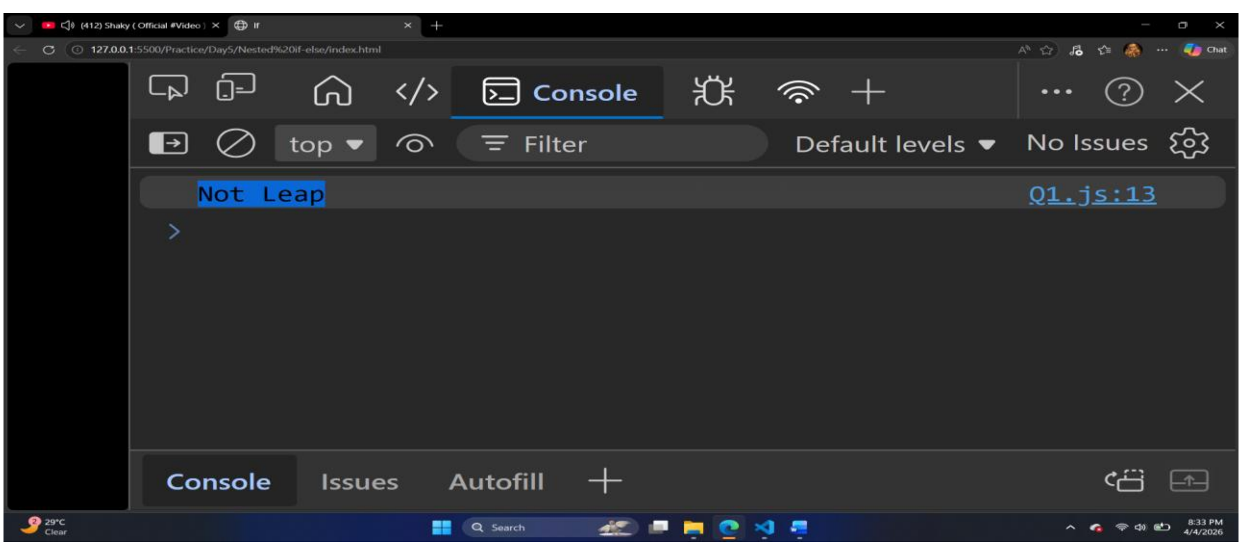
if(temp>=30){
   if(temp>=70){
      console.log(`Hot and Humid`)
   }
   else{
      console.log(`Hot and Not Humid`)
   }
}
else{
   console.log(`Normal Temperature`)
}
```



Q8) Check if year is leap year, then check if divisible by 400 or 4.

```
let year=8001

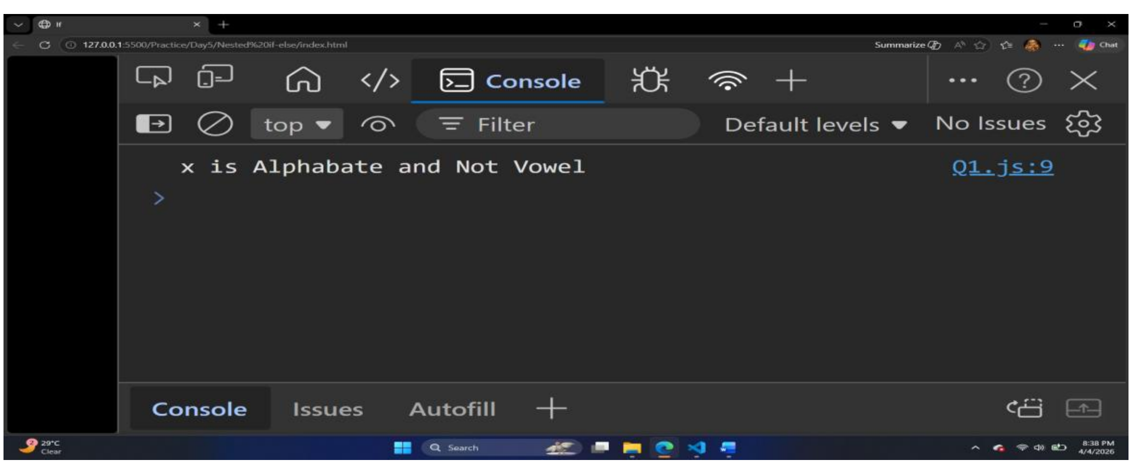
if(year%4==0){
    if(year%400==0){
        console.log(`Year is Leap and Divisible by 4 and 400`)
    }
    else{
        console.log(`Year is Leap and Divisible by 4`)
    }
}
else{
    console.log(`Not Leap`)
}
```



Q9) Check if character is alphabet, then check vowel or consonant.

```
let ch='x'

if(ch>='a' && ch<='z'){
   if(ch==='a' || ch==='e' || ch==='i' || ch==='o' || ch==='u'){
      console.log(`${ch} is Alphabate and Vowel`)
   }
   else{
      console.log(`${ch} is Alphabate and Not Vowel`)
   }
}
else{
   console.log(`${ch} is NOt an Alphabate`)
}
```



Q10) ATM system: balance > 0, then check withdrawal amount.

```
let balance=100000000

let withdrawl=5000

if(balance>0){

   if(withdrawl<=balance){

      console.log(`Withdrawl Successful`)

   }

   else{

      console.log(`Insufficient Balane`)

   }

}

else{

   console.log(`balance is not valid`)

}
```
