11. What is the use of <label> tag?
12. What are new HTML5 elements?
13. What is localStorage vs sessionStorage?
14. What is accessibility (ARIA)?
15. What is SEO-friendly HTML?
16. Difference between <section> and <article>?
17. What is <canvas>?
18. What is <audio> and <video>?
19. What is the purpose of alt attribute in images?
20. What are data-* attributes?

CSS Interview Questions (20)

1. What is CSS?
2. Types of CSS (inline, internal, external)?
3. What is specificity?
4. Difference between class and id?
5. What is box model?
6. Difference between margin and padding?
7. What is display property?
8. Difference between block, inline, inline-block?
9. What is flexbox?
10. What is grid?
11. **Difference between flexbox and grid?**
12. What is position property?

UPSKILL IT TRAINING AND PLACEMENT

13. Difference between relative, absolute, fixed?
14. What is z-index?
15. What are pseudo-classes?
16. What are pseudo-elements?
17. What is media query?
18. What is responsive design?
19. What is overflow property?
20. Difference between visibility: hidden and display: none?

JavaScript Interview Questions (20)

1. What is JavaScript?
2. Difference between var, let, const?
3. What is hoisting?
4. What is closure?
5. What is callback function?
6. What is promise?
7. Difference between synchronous and asynchronous?
8. What is event loop?
9. What is DOM?
10. What is BOM?
11. What is this keyword?
12. Difference between == and ===?
13. What is arrow function?
14. What is array methods (map, filter)?
15. What is JSON?
16. What is localStorage?
17. What is sessionStorage?
18. What is event delegation?
19. What is debounce and throttle?
20. Difference between null and undefined?

Core Concepts

1. What is execution context in JavaScript?
2. What is scope chain?
3. What is lexical scope?
4. What is temporal dead zone (TDZ)?

UPSKILL IT TRAINING AND PLACEMENT

5. Difference between function declaration and function expression?
6. What are higher-order functions?
7. What is pure function?
8. What is immutability?
9. What is currying in JavaScript?
10. What is IIFE (Immediately Invoked Function Expression)?

Async JavaScript

1. What is async/await?
2. Difference between Promise and async/await?
3. What is callback hell?
4. What is microtask queue?
5. Difference between setTimeout and setInterval?
6. What happens when multiple async calls run?
7. What is Promise.all()?
8. What is Promise.race()?
9. What is fetch API?
10. What is error handling in async code?

Objects & Arrays

1. What is object destructuring?
2. What is array destructuring?
3. What is spread operator (...)?
4. What is rest operator?
5. Difference between shallow copy and deep copy?
6. What is Object.keys(), Object.values()?
7. What is map(), filter(), reduce()?
8. Difference between forEach and map()?
9. How to remove duplicates from array?
10. How to merge two arrays?

DOM & Browser

1. What is DOM manipulation?
2. Difference between innerHTML and innerText?
3. What is event bubbling?
4. What is event capturing?

UPSKILL IT TRAINING AND PLACEMENT

5. What is preventDefault()?
6. What is stopPropagation()?
7. What is localStorage vs sessionStorage?
8. How to create elements dynamically?
9. What is querySelector()?
10. Difference between getElementById and querySelector?

ES6+ Features

1. What are template literals?
2. What are modules in JavaScript?
3. What is default export and named export?
4. What is optional chaining (?.)?
5. What is nullish coalescing (??)?
6. What is Symbol?
7. What is BigInt?
8. What are classes in JavaScript?
9. What is constructor?
10. What is inheritance in JS?

Bootstrap Interview Questions

1. What is Bootstrap?
2. What are the advantages of using Bootstrap?
3. What is Bootstrap Grid System?
4. How many columns are there in Bootstrap grid?
5. What are breakpoints in Bootstrap?
6. Difference between container and container-fluid?
7. What is a responsive design?
8. What are Bootstrap components?
9. What is a Navbar in Bootstrap?
10. What is a card in Bootstrap?
11. What is the use of Bootstrap classes?
12. What is spacing utility (m, p)?
13. Difference between col-sm, col-md, col-lg?
14. What is Bootstrap modal?
15. What is Bootstrap alert?

UPSKILL IT TRAINING AND PLACEMENT

16. What is Bootstrap carousel?
17. What is flexbox in Bootstrap?
18. What is d-flex class?
19. What is the use of btn classes?
20. How to include Bootstrap in a project?

jQuery Interview Questions

1. What is jQuery?
2. Advantages of jQuery?
3. Difference between JavaScript and jQuery?
4. What is \$ in jQuery?
5. What is document ready function?
6. Difference between .html() and .text()?
7. What is .val()?
8. What is event handling in jQuery?
9. Difference between .click() and .on()?
10. What is chaining in jQuery?
11. What is AJAX in jQuery?
12. What is .fadeIn() and .fadeOut()?
13. What is .hide() and .show()?
14. What is .addClass() and .removeClass()?
15. What is .css() method?
16. What is .append() and .prepend()?
17. What is .each() function?
18. What is event delegation?
19. What is .attr() method?
20. What is .remove() vs .empty()?

React Interview Questions

Basic Questions

1. What is React?
2. What are the features of React?
3. What is a component in React?
4. What is the difference between functional and class components?
5. What is JSX?
6. Why React is called a library and not a framework?

UPSKILL IT TRAINING AND PLACEMENT

7. What is the Virtual DOM?
8. How does React improve performance?
9. What is a single-page application (SPA)?
10. What is the use of render() method?

Components & Props

1. What are props in React?
2. What is the difference between props and state?
3. Are props immutable?
4. How do you pass data between components?
5. What is prop drilling?

State & Hooks

1. What is state in React?
2. What is the useState hook?
3. What is the useEffect hook?
4. What is the difference between useEffect and lifecycle methods?
5. Can we use hooks in class components?

Events & Forms

1. How are events handled in React?
2. What is a controlled component?
3. What is an uncontrolled component?
4. How do you handle form submission in React?

Advanced Basics

1. What is a key in React list?
2. What is conditional rendering?
3. What is React Router?
4. What is the difference between == and === in JavaScript (used in React)?
5. What are fragments in React?
6. What is the use of useRef?

React Router interview questions

1. What is routing in React?
2. What is React Router?
3. What are the main components of React Router?
4. What is the difference between BrowserRouter and HashRouter?
5. What is the use of Route component?
6. What is the purpose of Link component?

UPSKILL IT TRAINING AND PLACEMENT

7. Difference between Link and NavLink?
8. What is useNavigate hook?
9. What is useParams hook?
10. What is useLocation hook?
11. What is useRoutes hook?
12. What is nested routing?
13. How do you pass parameters in routes?
14. What are dynamic routes?
15. What is the exact path in routing?
16. What is a fallback route (404 page)?
17. What is Outlet in React Router?
18. What is lazy loading in routing?
19. What is protected route?
20. How to redirect in React Router?

Redux in React

1. What is Redux?
2. Why do we use Redux in React?
3. What are the core principles of Redux?
4. What are the main components of Redux?
5. What is a store in Redux?
6. What is an action in Redux?
7. What is a reducer?
8. What is dispatch in Redux?
9. What is the difference between state and props?
10. What is the Redux flow?
